Hiring Manager
Perth, WA

Dear Hiring Manager,

Thank you for taking a moment to read this. I'm a Perth-based designer looking for my next role in UX/UI, product or graphic design, and I'd love to be considered for any current or upcoming opportunities with your team. I hold a Master of Design from Monash University and bring more than four years across design and software engineering.

I design end to end, from user research and journey mapping to Figma prototypes, polished interfaces and design systems. I've designed and tested payment, login and KYC flows for PhonePe, built a component-based design system at ZevSmart, and run usability testing to make products easier to use.

I also love brand and graphic design. I create logos, packaging, menus, posters and social content for cafes and small businesses, and I built a full brand identity, from logo and guidelines to posters, merchandise and a website, for a festival. My background as a software engineer means I work closely with developers and get things built properly.

I'm organised, quick to learn and easy to work with, and I'm happy to start in a full-time, part-time or contract role.

I'd love the chance to show you my portfolio. You can scan the QR code on my resume, or reach me on +61 480 754 051.

Kind regards,
Sathya Priyadarshini Murugadoss
